RECOVERY COMPRESSION SLEEVE

TARGETED COMPRESSION TO AID IN UCL RECOVERY FOR BASEBALL PITCHERS

ATHLETE PROBLEM

Pitchers place extreme stress on the UCL with repetitive high-velocity throws, creating **microtrauma** that demands active recovery to prevent major injury.

Roughly **35%** of MLB pitchers have undergone UCL reconstruction surgery

Compression and **temperature therapy** are proven methods to reduce inflammation and support tissue recovery after repetitive UCL stress.

How might we create a product that supports pitchers experiencing UCL strain, enabling more effective recovery between outings and helping them reduce long-term stress on the elbow?

MARKET LANDSCAPE

STRENGTHS

- General compression
- General recovery benefits
- Comfort
- Athlete trust

GAPS

- Not UCL-specific
- Advertised for performance, not recovery
- Limited targeted compression zones
- Not designed for post-throw recovery between outings

Pitchers Only
Graduated Compression Sleeve
$ 30

EvoShield
Solid Compression Sleeve
$ 24.99

Therabody
RecoveryPulse Arm
$ 159.99

BRAND ALIGNMENT - EvoShield

- Designed for MLB athletes
- Trusted by youth players
- Strong reputation in arm protection
- Bridges protection and recovery

EVOSHIELD

TREND BOARD

VALUE

- Arm Care
- Throwing Hard
- Confidence
- Routines

MOOD BOARD

VIBES

- “Trust The Process”
- Sleek
- Discipline

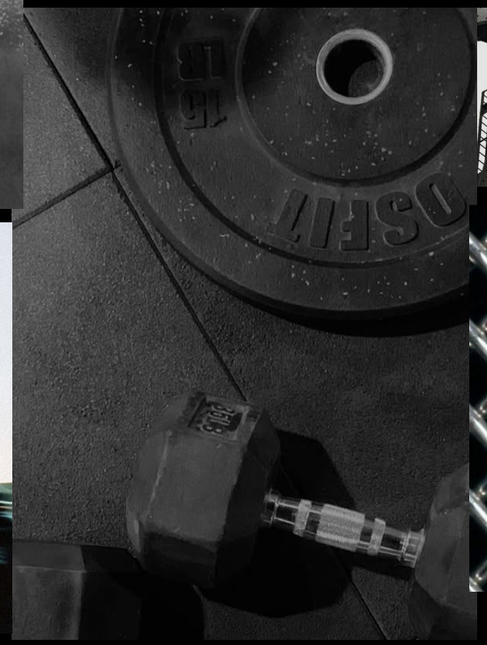

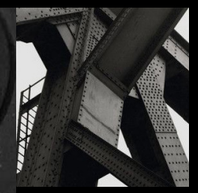

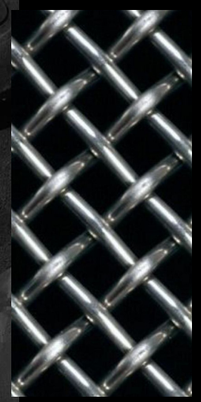

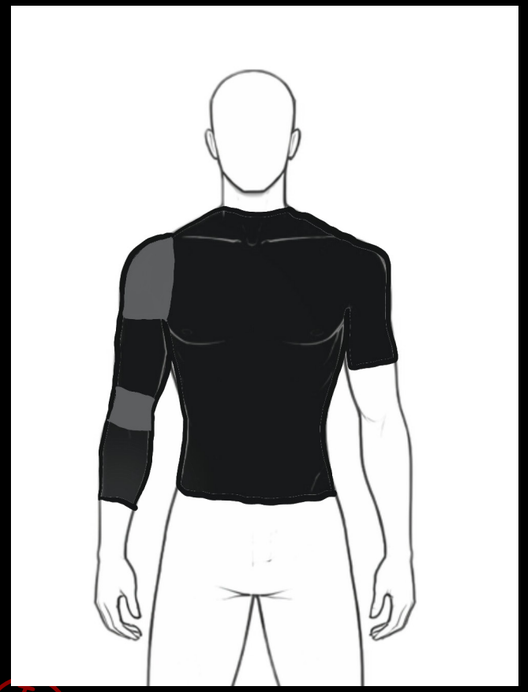

CONCEPT DEVELOPMENT

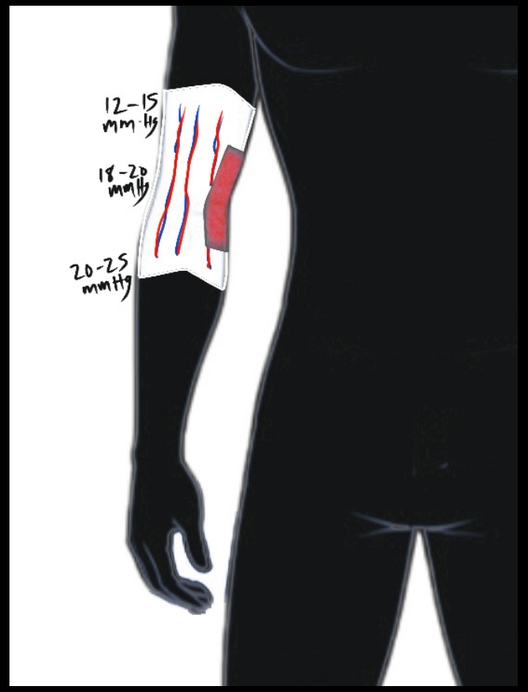

SKETCH EXPLORATION

- Silhouettes
- Targeted compression
- Temperature regulation
- 50+ sketches

PROTOTYPING

- Graduated compression sizing
- Pocket placement for heat/cold inserts
- Straps for targeted compression on UCL
- 7 prototypes

TECH INTEGRATION

CORE TECHNOLOGY

- UCL-focused support band
- Graduated pressure levels
- Pocket for temperature control
- Non-slip silicone liner

MATERIALS & CONSTRUCTION

- 87% Nylon/13% Spandex
- Flatlock seams
- Breathable knit structure
- Durable stretch fabric

TESTING & VALIDATION

- Compression level testing
- Pocket sizing checks
- Strap length trials
- Athlete wear tests

FINAL DESIGN SOLUTION

- **UCL-focused support band to provide adjustable targeted compression along the UCL pathway**
- **Graduated pressure levels to promote circulation and faster recovery**
- **Pocket along the UCL to deliver personalized post-throw temperature therapy**
- **Non-slip silicone liner to prevent the sleeve from sliding down the arm**

WHY THIS PRODUCT MATTERS

1. Recover faster between outings

2. Reduce accumulated stress on the UCL

3. Manage inflammation before it becomes injury

4. Feel more confident in their arm during high-volume throwing
